

The Sunis WireFree™ RTS Sensor... Using the Sun to Control Itself.

The Sunis WireFree™ RTS is a wireless sun sensor that is powered with an integrated solar cell and uses RTS to automatically extend an awning based on the sun's intensity. With its compact design and the absence of wiring, you will benefit from quick installations and easy programming.

Sunis WireFree™ RTS Sensor

PRODUCT HIGHLIGHTS

- Solar powered so consumers can achieve energy savings automatically.
- Compact design allows for quick installation.
- Compatible with Somfy's RTS motors, Eolis 3D WireFree™ RTS wind sensor and the Telis Soliris transmitters.
- Achieve maximum protection and comfort from the sun and wind when used together with an Eolis 3D WireFree™ RTS sensor.
