WINDOW SHADING SYSTEMS

OASIS® 2600 PATIO SUN SHADES

Manual solar screen shade with bungee hold-down system designed for patio applications up to 12' wide

- Sun glare, heat and golf ball protection
- Welded fabric edges & sealed aluminum hem bar
- Premium clutch & stainless steel idler that locks into bracket
- Bungee cord hold-down system for functional fabric stability
- Optional Fascia system to conceal roller

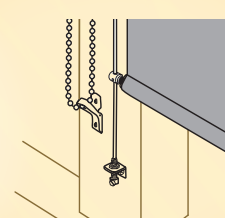

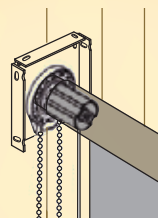

OASIS® 2650 PATIO SUN SHADES

Manual solar screen shade with cable guide system designed for patio applications up to 12' wide

- Sun glare, heat and golf ball protection
- Welded fabric edges & heavy-duty aluminum hem bar
- Premium clutch & stainless steel idler that locks into bracket
- PVC-coated stainless steel cable guide system for fabric stability
- Optional Fascia System to conceal roller

Child-safe Manual Clutch Operation

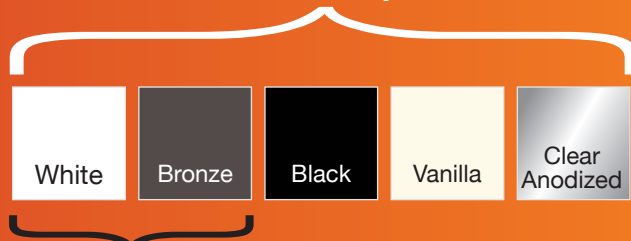

Oasis® 2600 & 2650 clutch-operated shades feature Insolroll's proprietary child-safe, Metal Select chain guide.

Both attractive and durable, Metal Select is available in 4 designer finishes, and exceeds safety standard for corded window coverings ANSI/WCMA A100.1-2012

We build a better shade, from start to finish.

Oasis® 2600 Fascia Finish Options

Oasis® 2650 Fascia Finish Options

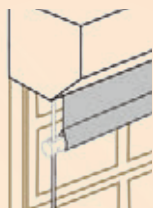

Our optional Fascia System for 2600 & 2650 models protects fabric when retracted.

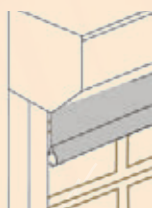

Motorized solar screen shade designed for window & patio applications up to 10' wide

- Outside windows, stops heat before it enters glass and protects valuable furnishings from damaging UV rays
- On patios, provides protection from sun glare, heat and golf balls
- 4" Aluminum headbox
- Welded fabric edges & heavy-duty aluminum hem bar
- Heavy-duty side track or cable system

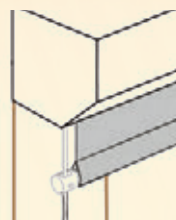

Choice of track guide (right) or cable guide (left) system to secure fabric

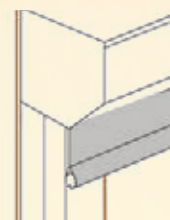

Manual or motorized exterior solar screen shade designed for patio applications up to 19' wide

- Sun glare, heat and golf ball protection
- 5" Aluminum headbox
- Welded fabric edges & heavy-duty aluminum hem bar
- Heavy-duty side track or cable system
- Optional Exposed Bracket for "built in" pocket installations and shades over 16' wide

Choice of track guide (right) or cable guide (left) system to secure fabric

Motorized Operation

Oasis® 2700 is motorized for convenience and safety in operating an exterior shade, with the full complement of control options available.

Motorized or Manual Operation

Oasis® 2800 is available with manual crank operation or motorized operation with the full complement of control options available.

Oasis 2700 & 2800 Headbox Finish Options

White

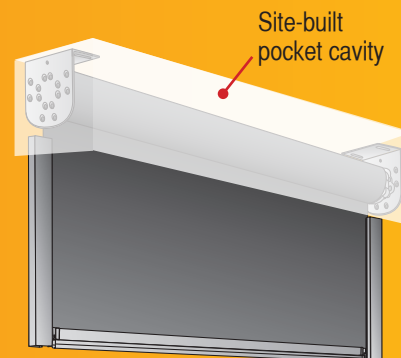

Bronze

Tan

Exposed Bracket Option for "Built in" 2800 & 2900 Shades

For new construction applications; your shade is built into a pocket space above ceiling. When in use, it lowers from pocket, and retracts into pocket out of view when not needed.

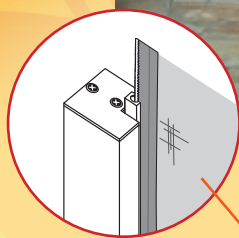

OASIS[®] 2900

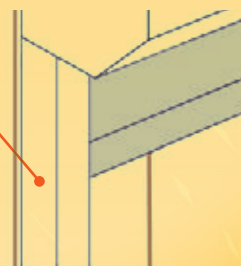

RETRACTABLE
INSECT SCREENS

Solar Insect Shade with 4-sided seal, designed for window, door, patio or garage door applications

- Insect Screen for bug and golf ball protection OR Solar Screen for added protection from sun glare and heat
- 5" Aluminum headbox
- Side track system captures zipper welded to fabric edge, keeping fabric taut as well as minimizing movement due to wind and elements
- Motorized Operation
